Mr.
Dear [REDACTED] Snow:
Please consider this letter a response to CALFED.
As a constant user of our
recreational rivers I oppose CALFED's
plan to raise existing dams or
build new off-stream storage ~~reservoirs~~
These would require massive diversions
from the Sacramento River.

I urge CALFED to take measures
to increase the efficiency of use
of existing water supplies instead.
This could be achieved by switching
to more water efficient crops and
drip irrigation.

I support CALFED's project management
goals for the central valley, including
removing such facilities as the ~~over~~

210116

Englebright - dam, that act as barriers
to migrating salmon, acquiring impenetrable
reptilian habitat, and increasing irrigation
flows for fish, wildlife, and recreation.

In general, we cannot solve our
problems caused by dams and diversions
by creating more of the same.

Sincerely,

Adam Dam
